PROFESSIONAL SUMMARY

AI and Blockchain-focused Developer with experience in building intelligent applications, Web3 ecosystems, decentralized applications (DApps), and full-stack systems. Skilled in developing AI-powered solutions, researching DeFi architectures, and creating technical products across blockchain and modern web technologies. Strong foundation in React, JavaScript, Solidity, AI workflows, and scalable application development.

SKILLS

- Blockchain, Web3, Solidity, DeFi Concepts
- React, JavaScript, Java, Flutter, Full-Stack Development
- Protocol Research, Tokenomics Analysis, Networking
- Git, Technical Documentation, Adaptability

WORK EXPERIENCE

Technical & Twitter Researcher – OpenLedger

- Built MVP concepts and translated Web3/DeFi research into technical product workflows and ecosystem strategies
- Conducted protocol-level research on DeFi architectures, tokenomics, on-chain interactions, and blockchain ecosystems
- Developed technical summaries, research documentation, and ecosystem analysis for internal and community-facing initiatives
- Created research-backed Twitter (X) content aligned with developer narratives, product positioning, and ecosystem growth
- Collaborated with teams on structured content systems, technical communication, and Web3 ecosystem visibility

INTERNSHIPS

- Vodafone Idea Foundation (VOIS & Edunet Foundation) – 4-week virtual internship on Blockchain Technology under CSR Program
- FAMS Private Limited – SAP BASIS Training
- Uniswap Hook Incubator – Advanced Uniswap v4 hook development and ecosystem exposure

PROJECTS

- AnonXpose – Blockchain-based crypto investigation and scam detection platform
- Land Vault – Smart contract system for crypto asset transfer and fractional ownership
- AI Rebal – AI-based energy management system
- Jayam Institute Website – Fully functional institutional website development
- MedTech AI – AI-powered medical assistant bot
- Crypto Calculator – Fiat to cryptocurrency conversion tool

- Dark Pattern Detection Extension – Browser extension detecting dark UX patterns

ACHIEVEMENTS

- Track Winner – Build on Chain (Kerala's Largest Web3 Hackathon 2024)
- Finalist – Smart India Hackathon 2023 (Blockchain)
- Finalist – Theervu-hathon (National Level)
- Finalist – iTechFuture Hackathon (AI)
- Finalist – Kavach 2023 Hackathon
- Participant – Student Startup and Innovation Policy (SSIP)

CERTIFICATIONS

- Data Foundations – Google
- Oracle Certified Foundation Associate
- Full Stack Development Bootcamp – Ebox

EDUCATION

Rathinam College of Arts and Science

B.Sc. Computer Technology with Blockchain | CGPA: 8.1

BMC Matric Higher Secondary School

XII: 69% | X: 64%
